

Program Licensure and Certification Requirements

CERTIFICATION EXAMS

NAA Federal Aviation Administration (FAA)-approval (14 CFR 65.77) satisfies FAA-Mandated Hours Requirement in oral and practical testing in 45 FAA-mandated subjects in three sections; General, Airframe, and Powerplant.

Upon completion of the AMT or AMP programs, NAA students qualify to test for the Federal Aviation Administration Airframe and Powerplant (A&P) certifications. The successful completion of these exam results in a federal license and as such, is not a state-based occupational licensing requirement.
